

Figure 1: The first letter of the *Iliad*

Same & Different

“identical” & “different”

“identity” & “difference”

Identity and **difference** depend on context.

$$\frac{1}{4} + \frac{1}{2}$$

$$\frac{1}{2} + \frac{1}{4}$$

$$\frac{3}{4}$$

You have an intuitive understanding of “Scholarly Identity”.

$$\frac{1}{2} + \frac{1}{4} = \frac{3}{4}$$

And you know that it is *functionally determined*, and that this depends on *technology*...

$$\frac{1}{2} + \frac{1}{4}$$

$$\frac{2}{4} + \frac{1}{4}$$

$$0.25 + 0.5$$

$$0.01 + 0.10$$

Let’s level up. We are not only computerers but Humanists...

“a quarter and a half”

“a half and a quarter”

~ ~ ~
a quarter and a half

(iambic trimeter)

~ ~ ~
a half and a quarter

(an iamb, a phyrtric, and a spondee?

or an amphibrach and a baccius?)

The Same or Different?

- “the son of Atreus, spear-loving Menelaos”
 - “Menelaos, son of Atreus”
-

The Same or Different?

“In 1815, M. Charles-François-Bienvenu Myriel was Bishop of D—— He was an old man of about seventy-five years of age; he had occupied the see of D—— since 806.”

“En 1815, M. Charles-François-Bienvenu Myriel était évêque de Digne. C’était un vieillard d’environ soixante-quinze ans; il occupait le siège de Digne depuis 1806.”

The Same or Different?

- “...what role will you play? Will you coordinate?”
 - “...what rôle will you play? Will you coördinate?”
-

Use this template!

Build a presentation with:

```
pandoc -t revealjs markdown.md -s -o identity.html --metadata  
pagetitle=identity
```

The result will be `identity.html`.
